INFORMATION TECHNOLOGY SERVICES

ANTI-VIRUS

Antivirus and Spyware protection are different types of threats. You may have a program that protects and scans against spyware and malware but **does not** protect you from viruses. Currently Kentucky Wesleyan College requires all personal computers connected to our network to have current anti-virus protection in place. Your anti-virus program must be running and current on all subscriptions. Any computer not meeting this requirement will be denied access to the Internet. These requirements are stated in our [Information Technology Handbook](#) under section 8. A lot of programs come with anti-virus and spyware in a bundled package. ***We highly recommend a bundled package but do not require it.***

Listed below are programs that IT Services strongly recommends:

1. Norton AntiVirus
2. McAfee VirusScan
3. BitDefender AntiVirus
4. Kaspersky AntiVirus
5. ESET
6. AVG Anti-Virus
7. Webroot Antivirus
8. Trend Micro
9. AVAST!
10. Panda Anti
