### WINDOWS UPDATES

Q: Turning on Windows Updates using Windows XP?

A: Instructions for XP users:

Check to make sure your computer is set to "Download and Install Windows Updates" automatically. You can do that by right-clicking on "My Computer" and going to "Properties." Click on the Automatic Updates tab. Make sure the top option is checked. That option is to install and download updates automatically. Please see picture below:

Q: Turning on Windows Updates using Windows Vista?

A: Instructions for Vista users:

Go to your "Start" button and click on "All Programs." Click on "Windows Updates" in the list. This window will tell you current settings. To change your settings, click on "Change Settings" on the left. Make sure the top option is checked. That option is to install and download updates automatically. Please see picture below:
